Building Carer Resilience Webinars

NOFASD Australia partnered with American FASD specialist Eileen Devine to create these valuable videos and resources. Taking care of yourself is essential, not just for your own wellbeing but also for your family.

Webinar #1 – Managing the Toll of Caregiver Trauma and Building Resiliency in Families Impacted by FASD

In this first webinar Eileen speaks honestly about the experiences which parents and carers face. She explains some of the processes behind burnout and trauma, then gives a lot of great ideas of how to make positive changes to increase parent/carer health and wellbeing. Our goal is that parents and carers watching this will feel empowered to make positive changes for themselves and their families.

Webinar #2 – The Human Elements of Implementing the Neurobehavioural Approach to Parenting

In this second webinar Eileen talks about the human elements, and challenges, of using the neurobehavioural approach when raising children with FASD. She talks about our values and the emotional reactions we have when our child's behaviour is in conflict with those values. Eileen discusses the parent journey of coming to an understanding of the neurobehavioral approach and highlights the need for self-compassion and self-acceptance, and the importance of honouring our human-ness
